

PPM Dies Monitoring System

Presentation Guide / Panduan Presentasi

Version: 1.0
Date: February 9, 2026

 PPM Dies Monitoring System

Overview / Gambaran Umum

English

PPM Dies Monitoring is a comprehensive system designed to monitor and manage Preventive Maintenance on manufacturing dies. The system tracks stroke accumulation, schedules maintenance, and provides real-time alerts to prevent die damage and ensure product quality.

Indonesia

PPM Dies Monitoring adalah sistem komprehensif yang dirancang untuk memantau dan mengelola Preventive Maintenance pada dies manufaktur. Sistem ini melacak akumulasi stroke, menjadwalkan perawatan, dan memberikan peringatan waktu nyata untuk mencegah kerusakan dies dan memastikan kualitas produk.

Key Features / Fitur Utama

Feature	English	Indonesia
 Real-time Monitoring	Track stroke accumulation in real-time	Melacak akumulasi stroke secara waktu nyata
 Smart Alerts	Automatic warnings when dies need maintenance	Peringatan otomatis ketika dies perlu perawatan
 Scheduled Maintenance	Plan PPM activities systematically	Merencanakan aktivitas PPM secara sistematis
 Production Tracking	Record daily production results	Mencatat hasil produksi harian
 Comprehensive Reports	Generate detailed analysis reports	Menghasilkan laporan analisis terperinci

Module Descriptions / Deskripsi Module

1. DASHBOARD

Screenshot Description / Deskripsi Tampilan

The Dashboard provides an at-a-glance overview of the entire PPM Dies Monitoring system status.

Dashboard menyediakan gambaran sekilas tentang status keseluruhan sistem PPM Dies Monitoring.

Features / Fitur

Component	English	Indonesia
Summary Cards	Display total dies, PPM pending, and critical alerts	Menampilkan total dies, PPM tertunda, dan peringatan kritis
Status Overview	Shows Green, Orange, and Red status counts	Menampilkan jumlah status Hijau, Orange, dan Merah
Quick Stats	Production statistics and trends	Statistik produksi dan tren
Recent Activity	Latest production logs and updates	Log produksi dan pembaruan terbaru

Status Color Coding / Kode Warna Status

Color	English	Indonesia	Condition
 Green	Safe - No maintenance required	Aman - Tidak perlu perawatan	< 75% of standard stroke
 Orange	Warning - Schedule maintenance soon	Peringatan - Jadwalkan perawatan segera	75% - 99% of standard stroke
 Red	Critical - Maintenance overdue	Kritis - Perawatan terlambat	≥ 100% of standard stroke

2. DIES LIST

Screenshot Description / Deskripsi Tampilan

The Dies List module displays all registered dies with their current status, stroke information, and maintenance history.

Module Dies List menampilkan semua dies yang terdaftar beserta status saat ini, informasi stroke, dan riwayat perawatan.

Features / Fitur

Component	English	Indonesia
Dies Table	Complete list with part number, name, customer	Daftar lengkap dengan part number, nama, customer

Component	English	Indonesia
Status Indicator	Visual PPM status for each die	Indikator status PPM untuk setiap die
Stroke Tracking	Current accumulation vs standard stroke	Akumulasi saat ini vs stroke standar
PPM Conditions	Two-condition PPM trigger system	Sistem trigger PPM dua kondisi
Search & Filter	Find dies quickly by various criteria	Temukan dies dengan cepat berdasarkan berbagai kriteria
Quick Actions	View, edit, and manage dies	Lihat, edit, dan kelola dies

PPM Trigger Conditions / Kondisi Trigger PPM

Condition 1 (Standard Stroke) / Kondisi 1 (Stroke Standar)

- **English:** PPM triggers when accumulation reaches 100% of standard stroke
- **Indonesia:** PPM dipicu ketika akumulasi mencapai 100% dari stroke standar

Condition 2 (4-Lot Rule) / Kondisi 2 (Aturan 4-Lot)

- **English:** PPM triggers every 4 production lots (based on lot size configuration)
- **Indonesia:** PPM dipicu setiap 4 lot produksi (berdasarkan konfigurasi ukuran lot)

3. SCHEDULE CALENDAR

Screenshot Description / Deskripsi Tampilan

The Schedule Calendar provides a comprehensive yearly view of PPM schedules for all dies organized by customer and tonnage.

Schedule Calendar menyediakan tampilan tahunan komprehensif dari jadwal PPM untuk semua dies yang diorganisir berdasarkan customer dan tonase.

Features / Fitur

Component	English	Indonesia
Yearly Calendar View	12-month schedule overview	Gambaran jadwal 12 bulan
Weekly Breakdown	4 weeks per month (I, II, III, IV)	4 minggu per bulan (I, II, III, IV)
Forecast Entry	Plan expected stroke per week	Merencanakan stroke yang diharapkan per minggu

Component	English	Indonesia
Plan Marking	Mark planned PPM weeks	Tandai minggu PPM yang direncanakan
Actual Tracking	Record actual PPM completion	Catat penyelesaian PPM aktual
PIC Assignment	Assign Person In Charge	Tetapkan Penanggung Jawab

Table Columns / Kolom Tabel

Column	English	Indonesia
NO	Row number	Nomor baris
NAME/PART NUMBER	Die identification	Identifikasi die
MODEL	Machine model	Model mesin
TOTAL DIE	Quantity of dies	Jumlah die
ACCUMULATION	Current stroke count	Jumlah stroke saat ini
PPM CONDITION	Trigger status visualization	Visualisasi status trigger
LAST STROKE	Latest stroke reading	Pembacaan stroke terakhir
PLAN	Planned maintenance	Perawatan yang direncanakan

Editable Fields / Field yang Dapat Diedit

- **F (Forecast):** Expected stroke count / Perkiraan jumlah stroke
- **P (Plan):** Planned week number / Nomor minggu yang direncanakan
- **A (Actual):** Actual PPM completion marker / Penanda penyelesaian PPM aktual
- **D (Date):** PPM execution date / Tanggal pelaksanaan PPM

4. PRODUCTION RESULT

Screenshot Description / Deskripsi Tampilan

The Production Result module records daily production output and automatically updates die stroke accumulation.

Module Production Result mencatat output produksi harian dan secara otomatis memperbarui akumulasi stroke die.

Features / Fitur

Component	English	Indonesia
Production Log Entry	Record daily production data	Mencatat data produksi harian
Die Selection	Choose die from registered list	Pilih die dari daftar terdaftar

Component	English	Indonesia
Shift Management	Track production by shift (1, 2, 3)	Melacak produksi berdasarkan shift (1, 2, 3)
Time Recording	Start time, finish time, break time	Waktu mulai, waktu selesai, waktu istirahat
Output Quantity	Record total stroke count	Mencatat jumlah stroke total
Auto Calculation	Automatic accumulation update	Pembaruan akumulasi otomatis

Form Fields / Field Formulir

Field	English	Indonesia
Select Die	Choose the die being used	Pilih die yang digunakan
Production Date	Date of production	Tanggal produksi
Shift	Work shift (1/2/3)	Shift kerja (1/2/3)
Line	Production line (250T, 800T, 1200T, Progressive)	Lini produksi
Running Process	Auto, Manual, or Blanking	Auto, Manual, atau Blanking
Start/Finish Time	Production time range	Rentang waktu produksi
Output/Stroke Count	Total strokes produced	Total stroke yang diproduksi

Important Notes / Catatan Penting

English: The stroke count entered here is automatically added to the die's accumulation stroke, triggering PPM status updates.
Indonesia: Jumlah stroke yang dimasukkan di sini secara otomatis ditambahkan ke stroke akumulasi die, memicu pembaruan status PPM.

5. IMPORT / EXPORT

Screenshot Description / Deskripsi Tampilan

The Import/Export module allows bulk data management through Excel file uploads and downloads.

Module Import/Export memungkinkan manajemen data massal melalui unggahan dan unduhan file Excel.

Features / Fitur

Component	English	Indonesia
Dies Import	Bulk import die data from Excel	Import data die massal dari Excel
Production Import	Import production logs from LHP	Import log produksi dari LHP
PPM Schedule Import	Import yearly PPM schedules	Import jadwal PPM tahunan
Template Download	Get formatted templates	Unduh template terformat

Component	English	Indonesia
Data Validation	Automatic data checking	Pengecekan data otomatis
Error Reporting	Clear error messages	Pesan error yang jelas

Supported Imports / Import yang Didukung

Import Type	Description (EN)	Deskripsi (ID)
Dies Data	Part number, name, customer, machine model	Nomor part, nama, customer, model mesin
Production Log	Daily production records	Catatan produksi harian
PPM Schedule	Yearly maintenance schedule	Jadwal perawatan tahunan

6. ⚡ STANDARD STROKES

Screenshot Description / Deskripsi Tampilan

The Standard Strokes module manages tonnage-based stroke standards that determine PPM triggering thresholds.

Module Standard Strokes mengelola standar stroke berbasis tonase yang menentukan ambang batas pemicu PPM.

Features / Fitur

Component	English	Indonesia
Tonnage Definition	Define stroke standards per tonnage	Tentukan standar stroke per tonase
Grade Classification	Classify by grade (A, B, C)	Klasifikasi berdasarkan grade (A, B, C)
Lot Size Configuration	Set strokes per production lot	Atur stroke per lot produksi
PPM Checkpoint Calculation	Auto-calculate PPM frequency	Hitung frekuensi PPM otomatis
Preview System	Visual preview of PPM logic	Pratinjau visual logika PPM

Configuration Fields / Field Konfigurasi

Field	English	Indonesia
Tonnage	Machine tonnage (e.g., 800T, 1200T)	Tonase mesin (mis., 800T, 1200T)
Grade	Quality grade classification	Klasifikasi grade kualitas

Field	English	Indonesia
Type	Standard, Heavy Duty, etc.	Standar, Heavy Duty, dll.
Standard Stroke	Maximum strokes before PPM	Stroke maksimum sebelum PPM
Lot Size	Strokes per production lot	Stroke per lot produksi

PPM Calculation Example / Contoh Perhitungan PPM

Standard Stroke: 6,000
Lot Size: 375

Total Lots = 6,000 ÷ 375 = 16 lots
PPM Checkpoints = 16 ÷ 4 = 4x PPM

PPM triggers at lots: 4, 8, 12, 16

7. 👥 USER ROLES

Role Matrix / Matriks Peran

Role	English Description	Deskripsi Indonesia	Access Level
Admin	Full system access	Akses penuh sistem	All modules
MTN Dies	Maintenance team	Tim perawatan	Dies, Schedule, Production, Import
Production	Production operators	Operator produksi	Dashboard, Production, Import
PE	Production Engineering	Teknik Produksi	Dashboard, Production, Reports
MD	Management	Manajemen	Dashboard, Dies, Reports
MGR/GM	Manager/General Manager	Manajer/General Manager	Dashboard, Dies, Reports

8. 🔔 ALERT SYSTEM

Alert Types / Jenis Peringatan

Alert	English	Indonesia	Trigger
🟡 Orange Alert	Warning notification	Notifikasi peringatan	75% of standard stroke
🔴 Red Alert	Critical notification	Notifikasi kritis	100% of standard stroke
✅ PPM Complete	Maintenance completed	Perawatan selesai	After PPM execution
📄 Daily Summary	Daily status report	Laporan status harian	Scheduled daily

Notification Channels / Saluran Notifikasi

- **Email:** Automated email alerts / Peringatan email otomatis
- **In-App:** Dashboard notifications / Notifikasi dashboard
- **Bell Icon:** Real-time notification bell / Lonceng notifikasi waktu nyata

System Benefits / Manfaat Sistem

English

1. **Prevent Die Damage:** Timely maintenance prevents costly repairs
2. **Improve Product Quality:** Well-maintained dies produce better parts
3. **Increase Efficiency:** Automated tracking reduces manual work
4. **Data-Driven Decisions:** Comprehensive reports support planning
5. **Reduce Downtime:** Scheduled maintenance minimizes unexpected stops

Indonesia

1. **Mencegah Kerusakan Die:** Perawatan tepat waktu mencegah perbaikan mahal
2. **Meningkatkan Kualitas Produk:** Dies terawat menghasilkan part lebih baik
3. **Meningkatkan Efisiensi:** Pelacakan otomatis mengurangi pekerjaan manual
4. **Keputusan Berbasis Data:** Laporan komprehensif mendukung perencanaan
5. **Mengurangi Downtime:** Perawatan terjadwal meminimalkan berhenti tak terduga

Technical Specifications / Spesifikasi Teknis

Component	Technology
Backend	Laravel 11 (PHP 8.2+)
Frontend	React + Inertia.js
Database	MySQL/MariaDB
Styling	Tailwind CSS
Icons	Font Awesome
Charts	Recharts
Export	Laravel Excel (Maatwebsite)
